

IFAS – New Requirements

1. Convert Cash Clients to Policyholders

Implement a feature that allows a cash client to be converted into a policyholder client

The conversion process should retain the client's existing information and update their client status accordingly.

2. Claims Approval and Funeral Planning

Once a Claims Manager approves a claim, the approved claim benefits should automatically appear on the Funeral Planner Dashboard.

The Funeral Planner should then be able to proceed with the funeral planning process based on the approved benefits.

3. Claim Status Search

Add a search field to the Funeral Planner Dashboard.

The search functionality should allow Funeral Planners to search for a claim and view its current status

4. RMA Declined Claim Notification

If the RMA declines a claim, the Funeral Planner should automatically receive a notification informing them that the claim has been declined.

The notification should clearly indicate that the funeral planning process must be stopped for that claim.
